Summary

Impact focused analytics professional with 8+ years of experience turning data into strategic business decisions. Known for strong business and financial acumen, end-to-end ownership, and cross-functional collaboration, driving data-led growth and creating measurable business value.

Professional Experience

Senior Data Analyst | Walmart | Chennai, IN

Nov 2023 - Sep 2025

- Spearheaded cross functional delivery of merchant access to Directed Spend and tax advantaged accounts related sales data, resolving logic gaps, missing historical data and system migration to unlock a ~6B market opportunity, in turn improving system reliability, empowering merchants with actionable insights, and ensuring adherence to data governance standards
- Consulted with product and business stakeholders to build, scale and deploy analytics products after successful prototyping, thereby enabling data driven decision making
- Identified and validated the quality of the data sources, and work with engineers to develop a high-quality data product, helping suppliers to understand customer behaviour and discover unmet customer need.
- Proved and scaled the impact of data products with executive dashboards and standardized analytics documentation.

Data Scientist 1 | PayPal | Chennai, IN

May 2021 - Nov 2023

- Designing and building Qlik Sense and Looker Dashboards tailored to the internal sales team's specific business requirements, enhancing data visualization and analysis capabilities
- Developing SQL queries to extract data for dashboards, automating data extraction processes using UC4 and Notebooks, and ensuring seamless data integration from multiple sources
- Validating the accuracy of data displayed in dashboards, ensuring reliable and actionable insights for leadership team
- Designing and evaluating complex experiments through a/b testing.
- Presenting comprehensive understanding of businesses & data, enabling delivery of customized & insightful dashboards
- Gathering valuable insights from the dashboards and presenting them to clients, facilitating data-driven decision-making

Analyst | LatentView Analytics | Chennai, IN

Sep 2019 - May 2021

- Created QlikView dashboards for clients, aligned with their specific business requirements, and enhanced data visualization and analysis capabilities
- Ensured the accuracy of data displayed in the dashboards, provided reliable and actionable insights for clients
- Developed a deep understanding of clients' businesses and data, enabled the delivery of customized and insightful dashboards
- Presented valuable insights derived from the dashboards to clients, facilitated data-driven decision-making
- Identified and recommended new analytics techniques for current and prospective clients, supported the marketing team in expanding the company's client base

Data Analyst | Acurus Solutions | Chennai, IN

Dec 2016 - Sep 2019

- Conducted descriptive analysis using R and Excel, providing valuable insights into business performance and trends
- Improved procedures for data extraction, transformation & integration using SQL & Talend, enhancing efficiency & data quality
- Developed financial reports using Excel and BIRT, enabling informed decision-making for stakeholders
- Identified opportunities for improvement and automation of standard reports used in production control, streamlined processes and reduced manual intervention
- Created dashboards for physicians and stakeholders, provided actionable insights and facilitated data-driven decision-making
